

New features in the Sketch Engine Interface part II

Vít Baisa

[vit.baisa@sketchengine.co.uk](mailto:vít.baisa@sketchengine.co.uk)

4th Sketch Engine Workshop
Tallinn, October 16, 2013

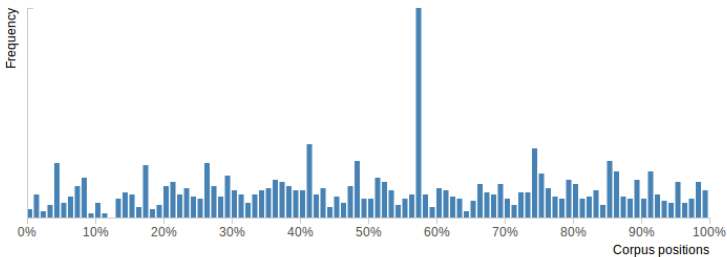

What is new

- visualizations: making Sketch Engine fancy
 - thesaurus wordcloud
 - concordance distribution bar chart
- features for teachers
 - filtering concordance with selected lines
 - line numbers in concordance
- features for better user-friendliness
 - better navigation: breadcrumbs menu
 - one-click copying without Flash
 - check input values before submitting a form
 - last used sample size

The screenshot displays a web application interface. On the left, a list of text snippets is shown, each preceded by a red 'test' or 'testing' label. A yellow highlight is visible over one of the snippets. On the right, a detailed view of the selected snippet is shown, featuring a blue box with HTML code for copying. The code includes a 'test' label and a 'testing' label, followed by a paragraph of text. The text describes a decision by Namibia's Department of radiation protection equipment, its hold, and the universality of the 'universal' routes of such concepts. It also mentions UNITED DISTILLERS is both individual abilities and abilities at supervisory management level to achieve skills such as application, evaluation, to be part of the assessment schedule, by college devised assessment schemes which via two papers, one open book and one in two ways: a) centre devised assessment via centre devised assessments and via in each assignment ie. students' knowledge or examinations d) dates of meetings of Model of an ancient Egyptian Brewhouse. THE WATERS OF BABYLON Thus it came about other species of shellfish for contamination case for the strength of the new green in the South Pacific has been condemned.

The detailed view also includes a paragraph of text: "Namibia seal row puts new legislation to the test Tests have shown that about half of the traditional folk remedies of such areas have pharmaceutical potential. Nonlinear optics is perhaps unique among systems showing chaos in that a fully quantum mechanical description of the phenomena is conceivable: there is the interesting and exciting prospect that the next few years may reveal what, if anything, is meant by 'quantum turbulence', and all-optical systems such as those described or proposed above are likely to be in the forefront of experimental tests of such concepts. No formal examinations are specified for the certificate programme but HCIMA will expect some form of unseen (possibly end of study) testings to be part of the assessment schedule. C1 to C5 will be tested by college devised assessment schemes which will be moderated by HCIMA.
